What is a Hunter's Moon? The October 2022 Full Moon is named the Hunter's Moon. The Hunter's Full Moon receives the name, because it signaled the time of year when hunters began collecting food and storing it for the long and cold winter months. The moon itself is simply the first full moon to follow the Harvest Moon, which is the full moon nearest to the autumnal equinox. Most Harvest Moons come in September, but every three years, the Harvest Moon falls in early October and the Hunter's Moon in November.
